

SOUTH ATLANTIC CRUISE: FROM ANTARCTICA TO SOUTH AFRICA

Gaze at captivating glaciers and majestic icebergs as we sail from Ushuaia to the icy wilderness of the South Shetland islands. Immerse yourself in the magnificent landscapes of the Antarctic Peninsula. Encounter nesting Adelie penguins and downy snow petrels. Explore the stunning scenery of South Georgia, home to the world's largest macaroni penguin population. Then observe some of the world's rarest animals on the volcanic islands of Tristan da Cunha. End your epic voyage in South Africa's capital, Cape Town, knowing you've made memories you'll treasure for a lifetime.

Itinerary changes and surprising experiences are part of expedition cruise life. The world has a habit of amazing us with incredible things when we yield to the unexpected. Join us with an open mind and a sense of adventure and you'll find that this can pay off in the most rewarding ways.

DAY 1

USHUAIA, ARGENTINA

Ushuaia is the gateway to the White Continent. Nestled in the foothills of the snow-capped Martial Range in Argentina's Patagonia region, Ushuaia's colourful streets and mismatched buildings cascade from the imposing mountains before coming to an abrupt halt at the shores of the Beagle Channel. Often described as 'the End of the World', the city carries the reputation well – the moody weather and dramatic surroundings certainly help.

DAY 2

DAY AT SEA

Sea days are rarely dull. Take the time to sit back and let the world go by. The ship's observation decks provide stunning views of the passing ocean. A day at sea gives you the opportunity to mingle with other passengers and share your experiences of this incredible trip or head to our library which is stocked full of reference books. Get an expert's view in one of our on-board lectures or perhaps perfect your photography skills with invaluable advice from our onboard professional photographers.

DAY 3-6

Expedition
Activities see
pages 7-10

ANTARCTIC PENINSULA

Among captivating glaciers, majestic icebergs and snowy islands, the Antarctic Peninsula is where most visitors to the White Continent live their Antarctica dream. It's the most accessible part, with scientific bases and incredible scenery, like the photogenic Lemaire Channel. Shore excursions might include Mikkelsen Harbour, where among gentoo penguins, snowy sheathbills and skuas, Antarctic Weddell seals haul out.

DAY 7-8

DAY AT SEA

Days at sea are the perfect chance to relax, unwind and do whatever takes your fancy. So whether that is going to the gym, visiting the spa, trying to spot a whale from the deck, reading a chapter or two, or simply topping up your tan, these blue sea days are the perfect balance to the green days spent exploring on land.

DAY 9-11

SOUTH GEORGIA, UNITED KINGDOM

Often called the 'Galapagos of the Poles,' South Georgia has a number of landing sites with tens of thousands of King Penguins and gentoo penguins, making up some of the largest population in the world alongside harrumphing elephant seals. Among its remarkable sites is Grytviken, the historic whaling station where legendary British explorer Ernest Shackleton (1874-1922) rests in peace.

DAY 12-15

DAY AT SEA

Today as you sail, you'll bask in the endless comforts of your ship. From the deck, marvel at the dramatic sea views. Relax with a nurturing facial treatment or massage in the spa or delve into the ship's learning resources. Or, simply take refuge in your cabin and enjoy the opportunity to rest.

DAY 16

TRISTAN DA CUNHA, UNITED KINGDOM

Seabirds outnumber humans on this remote British outpost in the middle of the southern Atlantic. Millions of species like the rare yellow-nosed albatross, skuas, terns and petrels, including the endangered Tristan albatross, inhabit the bluffs. Northern rockhopper penguins breed on the beaches, while upwellings attract whales and dolphins. Fur seals also haul out on the island teeming with avian life.

DAY 17-20

DAY AT SEA

Spend your day at sea enjoying your boutique 5-star ship. Treat yourself to a spa day, attend an expert-led onboard lecture or enjoy the ocean views from the deck or the comfort of our Observation Lounge.

DAY 21

CAPE TOWN, SOUTH AFRICA

Between mountains and the ocean, Cape Town is a vibrant, multicultural city with a lively waterfront featuring seafood restaurants, shopping and attractions. A cable car transports visitors to distinctive Table Mountain with sweeping views. Boats head to Robben Island, where Nelson Mandela was incarcerated. Boulders Beach is home to African penguins, and world-class Stellenbosch vineyards offer wine tastings amid Cape Dutch architecture.

Expedition Activities

ZODIAC CRUISING

SH Diana carries a fleet of Zodiac boats – these small, open-air vessels facilitate unique, in-depth experiences on the water. Guests can get close to steep-sided fjords and spectacular ice formations using our Zodiacs. While cruising, there's always a chance we will encounter fjord birdlife.

When exploring the planet's most remote corners, Zodiac cruising allows our guests to immerse themselves in their environment while removing everyday distractions. It's just you, a small group of companions and the surrounding pristine wilderness.

Zodiacs are safe and sturdy inflatable rib boats that can withstand harsh conditions. They are operated by highly trained Zodiac Drivers and present minimal impact to the ecosystems they visit. You'll be boarding these boats when you go on in-depth landings and explore places that are otherwise inaccessible.

Zodiac cruising is included in the price of your Swan Hellenic cruise

Guidelines

1. Before any Zodiac activities take place, you will first be given a safety and efficiency briefing.
2. Guests will then be divided into groups and our crew will help each group board their Zodiac safely, please follow their instructions.
3. Our guides are very experienced in Zodiac excursions and comply with Polar Tourism Guide Association standards.
4. If you're going to have a 'dry landing' it means you'll disembark your Zodiac at a dock or landing platform.
5. If you're going to have a 'wet landing' it means you'll have to disembark by stepping into the water, wearing rubber boots or reef/water shoes.
6. The Expedition Team will keep you updated on weather conditions so you can dress accordingly.
7. Wearing a safety vest is mandatory.
8. You should wear sun protection. We recommend sunscreen with a high protection factor and polarised sunglasses.
9. Zodiac excursions can involve riding on a Zodiac for up to two hours, keep in mind that dehydration or cold could affect your experience.

KAYAKING

Experience the tranquillity of the cool temperate waters in the Chilean region during a personalised kayaking excursion in a small group. Glide through this spectacular world at water level, exploring a maze of ever-changing fjord scenery, tidewater glaciers, and a multitude of icebergs in various shapes and sizes, all while keeping a watchful eye for the curious local wildlife.

You will need to have prior kayaking experience and some basic kayaking skills to participate in this excursion. Everything that you need for the trip will be provided by Swan Hellenic.

How do kayaking trips work?

Our kayaking trips take place in small groups led by our knowledgeable, qualified guides. Kayaking excursions operate at the same time as our shore excursions or Zodiac cruises, weather permitting. The number of kayaking trips that we operate per cruise itinerary varies. We will only run kayaking excursions when the weather conditions allow, and it is safe to do so.

Excursions usually last between 1.5 hours and 2 hours, depending on location and conditions.

Are there any restrictions?

Guests will need to be able to communicate in English as well as have previous kayaking experience to participate in this excursion. Group sizes are small, with a maximum of 8-10 guests in 4-5 double kayaks. This ensures that the guides can keep each participant safe and well informed.

Only one guest is allowed per kayak seat.

To ensure the safety of all participants, the minimum age for participation is 16 years old. Children can kayak if accompanied by an adult. Children must be able to transfer to the kayak from the Zodiac boat without assistance.

Kayaking is optional and subject to availability - it can be booked at extra cost.

OTHER ACTIVITIES

Hiking

Whenever there is a chance to explore earth's last great wilderness on foot, we will be operating hiking excursions. Our experienced expedition team will guide you along the frozen shores of Antarctica and enrich your knowledge by sharing theirs.

Grading a walk through wilderness terrain is very subjective – after all, one person's hill is another person's mountain! Our expedition staff will discuss experience and abilities with each guest and plan according to our grading system to ensure that everyone enjoys their hike. The Antarctic is a fragile environment, the terrain could be loose scree, snow or tundra. Stepping ashore in any wilderness location comes with responsibility, and will require an awareness of the environment and wildlife.

Wildlife

ADÉLIE PENGUINS

These penguins can be found in large colonies on the ice-free slopes of the Antarctic continent. During breeding season, they can often be seen sliding across the ice on their stomachs, making their way into the sea to get food for their chicks.

ANTARCTIC FUR SEALS

Antarctic fur seals were almost driven to extinction during the 18th century, when man hunted them for their skin and blubber. Today, they breed in dense colonies on beaches and rocks north of the pack-ice, where males fight for the right to rule a harem of females.

GENTOO PENGUINS

Gentoo penguins are the third-largest penguin species and can reach up to 81cm in height. They are easily recognisable with white patches above their eyes and a long tail which moves like a brush, hence their species name – *Pygoscelis* (brush-tailed).

HUMPBACK WHALES

Humpback whales are massive, and can grow up to the size of a school bus. They generally travel alone or in small groups, and are known for their incredible melodies and powerful, high breaches.

KILLER WHALES

Killer whales, also known as orcas, are the largest dolphins in the world. They have clever predatory techniques such as coordinated attacks on whales and wave washing seals off the ice.

LEOPARD SEALS

Leopard seals, recognisable by leopard-like spots on their throats and stomachs, are solitary animals and can often be found waiting by penguin landing and launch spots. They often catch penguins, bring them to the surface and vigorously shake them to their death.

WEDDELL SEALS

Weddell seals were discovered by British sealing captain James Weddell. It is one of the largest of its species and the most southerly ranging mammal in the world, living as far south as 78°S. They do not migrate and survive the harsh winter by maintaining breathing holes in the ice.

CHINSTRAP PENGUINS

With an estimate of 8 million individuals, chinstrap penguins are believed to be the most abundant penguin in the Antarctic. Easily recognisable by its narrow black band under its head making it look as if it were wearing a black helmet.

CRABEATER SEAL

By far the most abundant seal species in the world, the crabeater seal, also known as the krill-eater seal is a true seal with a circumpolar distribution around Antarctica. Its sieve-like tooth structure allows it to successfully filter out the small crustaceans they feed on.

KING PENGUINS

Only second in size to the emperor penguin they walk slowly and do not hop. It has the longest breeding cycle of all penguin species and just like the emperor penguin they do not build nests. The pupil of a penguin's eye is circular however when contracted, the pupils of a king penguin's eye are square. They dive up to depths of 300 meters.

ELEPHANT SEALS

Elephant seals spend about 80% of their lives in the ocean. They are able to hold their breath for more than 100 minutes and to dive to depths of up to 2380 meters in search of their favorite food. The largest of all seal species, elephant seals can grow up to 6metres long and weigh up to 5,000 kilograms.

BLACK-BROWED ALBATROSS

With a wingspan of up to 2.5 metres, this large seabird is adapted for long-distance gliding over the southern hemisphere ocean waters. With its dark underwings and back contrasting with its white belly and head, it's relatively easy to spot from a distance (the black brow is more obvious at a close range). The black-browed hunts for fish, squid, and krill – and can often be seen scavenging at fishing boats.

Packing List

WHAT TO PACK FOR YOUR ADVENTURE

The climate in Antarctica is quite unique, so we advise that you pack carefully. Of course, we understand that everyone feels the cold (and warmth) differently, but there are certainly some recommendations that will benefit most Antarctic adventurers.

Daily temperatures in the Antarctic Peninsula can range from well below freezing to the upper 40°F/4°C. The windchill factor can make these temperatures feel much colder.

Keep in mind that you will be spending most of your time outdoors on or near the water, where open spaces will be subject to strong, cold winds. The outside temperature can feel much colder than the reading on the thermometers. We would recommend that you dress a little warmer than you usually would for the temperature.

ONBOARD

Everyday attire

Expedition cruises are primarily concerned with what happens outside the ship, so dress codes are relaxed. Your clothing aboard the ship should be comfortable and easy to wash and pack. Think casual such as shorts, lightweight trousers, t-shirts and breezy tops, with reef shoes or wet sandals for excursions. It's a good idea to also have a light sweater or cardigan for cooler evenings on deck.

We recommend you pack swimming gear for your excursions, spa and pool, as well as fitness attire if you plan to visit the fitness centre while on board.

Dressing for dinner

We keep our evenings casual too. Perhaps pack a couple of casual shirts, and/or skirts or dresses.

Footwear

Keep footwear light and easy to pack. Onboard a pair of lightweight trainers will be adequate. Women are strongly advised not to bring high-heeled shoes, especially stiletto heels. The seas can get rough at times, and you'll need your balance. Slippers should only be worn in your cabin.

Arrival and departure locations

Remember to pack clothes and shoes appropriate for the cities where your itinerary begins and ends. They may be in very different climates with different activities on offer.

Zodiac landings

For shore excursions, Swan Hellenic will provide:

- Swan Hellenic Expedition branded water and windproof parka and backpack and a refillable water bottle.

These will be yours to keep at the end of the cruise.

- Rubber Muck boots
- Life jacket

Swan Hellenic Expedition parkas

Your Swan Hellenic Expedition parka will be waiting for you in your stateroom on the first day of the cruise.

The 3-in-1 two-layer parka features:

- A 3M Finetex Taslan 330D membrane
- 5,000 mm waterproof technology
- 5,000 gm breathability
- An adjustable hood with microfleece lining for extra warmth, and a visor for optimal visibility in all conditions
- A high collar that protects your neck and face when the hood is down
- Elongated cuffs, secured over the gloves with two adjustable buckles (instead of Velcro, complying with local biosafety regulations)
- An elongated back for comfortable seating in Zodiac boats

Don't get wet

Water making its way under your clothes can quickly cause discomfort. It can also lead to health issues, so it's best to make sure that you do as much as you can to avoid getting wet.

It's quite easy to get wet when on an excursion. Rain, snow, seawater spray and splashes are just a few of the ways that water can get in.

Your Swan Hellenic Expedition parka will protect most of your body from wind and water, but what else should you wear to make sure that you are completely water-free?

For mid and bottom layers, wool, silk, and polar fleece are much better choices than cotton. Materials should be breathable to prevent condensation from gathering under your parka.

Waterproof trousers for Zodiac trips and land excursions are essential. We would recommend wearing them over normal pants or thermal underwear.

It's all about layers

Layering your clothing is key to maintaining a comfortable body temperature. It's always better to wear several lightweight layers than one heavier one. You can always remove or add more layers of clothing as your body temperature changes.

We would recommend loose-fitting layers which allow for pockets of air between each item of clothing. This helps provide additional insulation.

Footwear

You will be provided with a pair of rubber Muck boots for Zodiac excursions and onshore landings.

We would advise bringing wool or insulated socks to wear with the Muck boots. Bring several pairs of warm socks with you. When choosing your socks, we would recommend focusing on quality and material rather than thickness. Merino wool, nylon and organic fibres are best for wicking moisture away and preventing blisters. You'll be able to find appropriate socks in most specialist outdoors shops.

Hats and gloves

You will need to make sure that you keep your head warm on deck and during landings. Bring a warm, windproof hat that covers your head and ears. We would also recommend wearing a collar scarf to protect your neck and chin from the elements. You may also wish to bring a balaclava for additional protection.

It's also important that you keep your hands warm and dry. Packing mittens, ski gloves and insulated glove liners will keep you covered for all weather eventualities.

WHAT ELSE?

Bags

We provide a branded waterproof backpack, which will be useful for protecting your camera and any other electronic gear that you want to bring for shore landings. However, we would also recommend an additional waterproof case for your camera.

The animals and plants of the Antarctic are protected under the Antarctic Treaty, and pollution is strictly regulated. As such, we advise our guests to avoid bringing certain materials ashore. We advise against using plastic bags for waterproofing items.

Please note that it is completely forbidden to bring plastic bags ashore in South Georgia.

Sun protection

Sunglasses are recommended to protect your eyes from the sun as well as from the snow glare. We would recommend bringing plastic-framed glasses, not metal, as they are less likely to bend and break.

It is also advisable to bring high SPF sunscreen for your face, along with hand cream and lip balm. In Antarctica, the sun's rays reflect off the water, snow, and ice, even when the weather is overcast. Keeping sun protection in mind when packing is essential.

Medication

In addition to any prescription medication, you may also need to think about bringing motion sickness pills. You should make sure that you have an adequate supply of any medication that you need. Seasickness medication will also be available on board at the front desk should you need it.

Electricity

Don't forget to pack chargers for all the electronic equipment that you're bringing aboard. While there are 110 and 220 volt outlets in your stateroom, it's recommended that while travelling internationally you should bring a universal power plug adapter.

FAQ

Have Questions? Check out our [FAQ page](#) for answers to common queries.

RECOMMENDED PACKING LIST

- ☐ Shoes and clothing for arrival and departure cities
- ☐ Waterproof trousers
- ☐ A wool jumper or fleece jacket
- ☐ A bodywarmer or sweatshirt
- ☐ Two sets of thermal underwear
- ☐ A turtleneck jumper and a long sleeve shirt
- ☐ One or two t-shirts
- ☐ Jeans or other comfortable trousers
- ☐ Sports clothing for the onboard fitness centre
- ☐ Swimwear for visiting the spa and pool
- ☐ Two pairs of mittens, gloves, and glove liners
- ☐ A warm windproof hat
- ☐ A warm shawl or scarf
- ☐ A balaclava or neck tube
- ☐ Warm socks (several pairs), merino wool, nylon or organic fibre
- ☐ Warm hat, not wide-brimmed
- ☐ Trainers or comfortable shoes that are easy to walk in whilst on board
- ☐ A waterproof, airtight case for your camera and other electronic gear
- ☐ UV-protective sunglasses
- ☐ Sunscreen for face and lips, hand cream and lip balm
- ☐ Camera, extra memory cards and flash drives, extra batteries, and lenses
- ☐ Laptop or tablet for taking notes and uploading photos
- ☐ Chargers for electronics, adapters, and power banks as required
- ☐ An extra pair of eyeglasses or an extra set of contact lenses
- ☐ Medical supplies prescribed by your doctor, with a few extra days to spare

Your ship

Capacity	192 Guests 127 Crew
Number of Decks	9
Length	410ft (125m)

FINE DINING

No travel experience is complete without unforgettable dining.

Join us on a culinary journey and enjoy a tantalising, expertly prepared range of dishes whilst aboard your cultural expedition cruise. With responsibly sourced local ingredients, you will discover a world of flavour – the perfect accompaniment to your enriching exploration.

Swan Restaurant

Every evening, the Swan Restaurant transforms into a gourmet venue serving the sublime creations of Michelin star award-winning consultant chefs Andrea Ribaldone and Sang Keun Oh.

Guests on a Swan Hellenic cultural expedition cruise thus embark on a parallel voyage, discovering a world of extraordinary flavours, textures and contrasts. Expect creative Asian and Italian fusion cuisine as well as more traditional but no less astonishingly inventive French, Chinese, Japanese and International classics.

Club Lounge

Open from early hours to late at night, this social space has the feel of an expansive living room, leading out to the al fresco Pool Grill and Bar.

Throughout the day, the Club Lounge transforms in response to our guests' needs. From a haven for early risers in the morning, it then becomes the perfect light lunch spot. In the afternoon, this inviting space welcomes guests for afternoon tea before offering casual dining options later in the day.

In the evening, the Club Lounge hosts a family-style diner, offering an ideal spot for a casual catch-up on the day's events.

Pool Grill & Bar

Head to the al fresco Poolside Grill & Bar for grilled classics including hot dogs, burgers and fish – all to be enjoyed surrounded by stellar views of the glistening seas and striking landscapes. This is a barbeque you won't forget in a hurry!

The fully stocked outdoor bar serves expertly crafted cocktails and a large selection of alcoholic and non-alcoholic drinks.

Room Service

No matter what time of day, our carefully curated in-room menu gives you a relaxing yet tasty experience in the comfort of your own stateroom.

From healthy breakfasts, luscious lunches and divine dinners to late-night snacks, there's always something ready to tempt you.

ENRICHMENT

Exploratory travel is in our DNA, which is why our onboard experts are focused on ensuring our guests return home having had the most authentic experience possible.

Our experts bring specialist knowledge and insight to the scientific, geographic and historical aspects of the regions we visit. This allows our guests to fully appreciate the environments they are travelling in.

Observation Lounge

The main venue for onboard lectures. Fully equipped with pop up screens and main stage to ensure every guest has a great view. After a day of exploration, sit back, relax and savour your favourite tippie whilst getting to know your fellow guests.

The Laboratory

Head to our onboard lab to learn more about our participation in the Citizen Science Programme. Meet our guest researchers, who are usually joining us on their way to or from a remote research location, and gain a deeper understanding of the important scientific work that is taking place in these fragile places.

Library

Our Library is the perfect place to borrow a new book from our wide selection. We have collected exclusive featured publications focused on travel, history and geographical discoveries, and albums and board games are also available.

RELAX AND UNWIND

After your onshore activities, treat yourself to some pampering and relaxation onboard. Mellow in our heated infinity pool and lap up the views from the extensive outside decks. Enjoy an indulgent massage, or take a sauna or outdoor hot tub with panoramic views.

Sauna & Spa

The sauna has been designed to put guests in close contact with the elements, featuring a full-length panoramic window. It's the perfect place for meditative moments after your onshore activities, a workout in the gym, or one of our wide range of treatments.

There are many options available, including Balinese spa, and beauty and wellness treatments – ranging from hot stone and bamboo massages, to pampering body care using the antioxidant-rich and entirely natural products of Lajatica Bocelli 1831. Facials, manicures, pedicures, a hair salon and barber services are also on offer.

The premium products used include La Mer seaweed extract treatments and the professional haircare products of Kérastase Paris. Lajatica products are also provided in every stateroom and public amenity on board.

Gym

Enjoy our state-of-the-art gym, equipped with cardio machines, stretch bands and free weights.

Pool & Jacuzzi

Designed with making the most of the wonderful views in mind, our outdoor hot tubs and infinity pool offer show stopping vistas of the surrounding environment. Sit back, unwind and enjoy being immersed in this incredible wilderness whilst indulging in total relaxation.

Expedition Cruising to Antarctica

WHAT TO EXPECT FROM YOUR ANTARCTIC JOURNEY

You are about to embark on the trip of a lifetime.

As members of the International Association of Antarctica Tour Operators (IAATO), we are committed to the principle that planned tourism activities will have no more than a minor or transitory impact on the Antarctic environment.

To guide your enthusiasm into a set of realistic expectations, here are some factors to keep in mind for your Antarctic journey:

- Each voyage to Antarctica encounters unique weather, sea-ice conditions and wildlife-viewing opportunities. Your trip will be one-of-a-kind, and may not visit some of the landing sites or scientific stations you may have heard about. Every activity is dependent on many factors, including weather and sea conditions, which can be a fascinating and memorable part of the journey.
- Expedition cruising to Antarctica is about the whole experience, and your expedition team strives to create remarkable experiences for each traveler.
- There may be opportunities for close-up viewing of wildlife and observing from further away – on Zodiac excursions, for example, or from the deck of your ship, which are some of the best ways to “see the big picture” and minimize disturbance. These platforms allow you to explore the ice, the glaciers, and to put wildlife in the larger context of the continent’s unique grandeur.
- Expedition cruising is all about spontaneity, discovery, exploration and an appreciation of the need for flexibility. It’s a chance to depart from the familiar and the expected – to slow down to observe a pod of whales or massive iceberg, for example.
- Your captain and expedition team – some of whom have visited Antarctic dozens or even hundreds of times and undergone rigorous training – return each year for the chance to see something new and to enhance their own appreciation and knowledge of this unique place. Take advantage of their expertise, ask them questions and listen to their stories.

Continued >>>

- Onboard presentations, briefings and recaps are a very important and time-honored component of expedition cruising that will complement and round-out your shoreside experience immensely. Your participation is encouraged.
- Stepping ashore in Antarctica is a privilege, not a right, and your expedition team will always plan shoreside activities in the best interest of the wildlife following recommended guidelines and long-standing protective measures.
- Traveling to Antarctica represents a unique opportunity to learn about the continent and its ecosystems. Your experience will deepen your understanding of the importance of conserving Antarctica for current and future generations. These lessons that you take home are as important as photographs.

- Be flexible and open to changes in the planned itinerary. With this approach to your expedition, you won't be disappointed.

Each one of us who visits Antarctica is responsible for keeping it pristine. The great ambitions, hopes and goals that naturally accompany such a journey should factor in the weather, wildlife, the enjoyment of fellow travelers, and the expertise of the guides.

Antarctic travel is a visceral experience, offering you an opportunity to immerse yourself in the sights, sounds, silence, smells, spray, chill and majesty of the one and only White Continent. Our goal is to help you experience all that Antarctica has to offer and leave it as you found it – a wondrous and unexpected first-time discovery for the next guest.

IMPORTANT - IAATO GUIDELINES

Please make sure you read the IAATO guidelines carefully before your cruise departure:
IAATO Guidelines

You will be expected to fully adhere to these guidelines throughout your Antarctica cruise.

To learn more about visiting Antarctica responsibly, please visit www.iaato.org.
